

How to Report Multi-Day Inspections in CERS

How should Multi-Day Inspections be reported in CERS?

Answer: Multi-day inspections, even those that take weeks or months for very large campus-type facilities should be reported as one inspection regardless of the number of days needed to complete the inspection. The term multi-day inspection in this FAQ refers to the number of days it takes to complete an initial routine inspection, or to complete one 'other' inspection. This term does not include re inspections to determine return to compliance or follow up inspections such as installation inspections that occur as a project progresses.

Violation dates reported in CERS may not be the same date as the inspection date reported in CERS as violations may be observed at any time during a multi-day inspection. If appropriate, a comment may be entered referring the reader to the full inspection record maintained by the UPA for more details.

For reporting in CERS, enter the **starting** date of the inspection in the 'Inspection Date' field as shown below. CalEPA does not require it but if an inspection end date is desired, use the comment field.

Create Inspection: Palo Alto City Hall (CERS ID: 10143311)
