

UST FAQ: How to report tank contents

How should I report tank contents?

Answer: This FAQ presumes that your tank contains **regulated** materials. Contact your local agency for more information. Use the [directory of local agencies](#) if you are unsure of who to contact.

The section for reporting tank contents is in the 'UST Tank Information/Monitoring Plan' section. Open this section and scroll down to the 'Tank Contents' subsection.

The screenshot shows two sections: 'Tank Use and Contents' and 'Tank Construction'. In the 'Tank Use and Contents' section, the 'Tank Contents' subsection is highlighted with a red border. It lists various fuel types with radio buttons: Regular Unleaded (selected), Premium Unleaded, Midgrade Unleaded, Diesel, Jet Fuel, Aviation Gas, Used Oil, Petroleum Blend Fuel, Other Petroleum, Ethanol, and Other Non-petroleum. The 'Tank Construction' section includes 'Type of Tank' (Single Wall, Double Wall, Unknown), 'Primary Containment' (Steel, Fiberglass, Internal Bladder, Steel + Internal Lining, Unknown, Other), and 'Secondary Containment' (Steel, Fiberglass, Exterior, Jacketed, None, Unknown, Other).

A number of questions have been raised about ethanol containing gasoline, biodiesel, and used/waste transmission fluid. The following table indicates the correct tank contents to select:

Reporting Recommendations for Specified Tank Contents

Substance Stored in Tank	Tank Contents selection
Gasoline with up to 12% ethanol	<i>Regular, Premium, or Midgrade Unleaded</i>
Gasoline with more than 12% ethanol (incl. E85)	<i>Petroleum Blend Fuel</i>
100% Ethanol	<i>Ethanol</i>
Biodiesel B5	<i>Diesel</i>
Biodiesel Blends greater than B5	<i>Petroleum Blend Fuel</i>
Biodiesel B100 with no petroleum additive	<i>Other Petroleum</i>
Renewable Diesel R1-R100	<i>Diesel</i>
Used or waste transmission fluid (ATF)	<i>Used Oil</i>
All other petroleum based substances	<i>Other Petroleum</i>
All other regulated substances	<i>Other Non-Petroleum</i>
