## HOW TO CHANGE A FACILITY ADDRESS IN CERS

This article includes helpful explanations and resolutions regarding issues received by the CERS Technical Support Team. If you have questions or concerns, email CERS Technical Support at: <a href="mailto:cers@calepa.ca.gov">cers@calepa.ca.gov</a>

The facility address **should not** be changed unless the postal address has changed (e.g., the street has been renamed) or you need to correct a previous data entry error. Only change the facility address if it needs a minor correction or as directed by the local regulator. If you have moved your facility/business to a new location with a different address, select "Add New Facility" from the Home page.

Warning: Do not change your Facility Address if you have moved your facility/business. Any changes made to the Facility Address will not be adopted throughout CERS until after the CUPA/regulator accepts your Facility Information submittal.

1) Sign-in to the CERS Business Portal and select the "Start/Edit Submittal" button for your facility.

2) Start a new Facility Information submittal. Then, select the 'Business Activities' form link.

3) Select the 'Edit' button, next to 'Business Site Address'.
