Unified Program Guidance Letter 14-05

PRIORITIZING REGULATED BUSINESSES' ELECTRONIC SUBMISSION OF UNIFIED PROGRAM INFORMATION

To: Unified Program Agencies

All businesses regulated under the Unified Program are required to electronically submit Unified Program information into the statewide information management system, which is defined as either the California Environmental Reporting System (CERS) or a local information management system that passes data to CERS. This guidance letter provides a tool for Unified Program Agencies (UPAs) to help guide the use of resources in systematically obtaining the required chemical inventory information from regulated businesses.

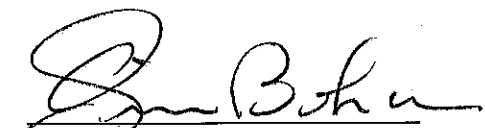

Pursuant to section 25404 (e)(4) of the California Health and Safety Code, UPAs and regulated business must report required Unified Program information electronically to the statewide information management system beginning January 1, 2013. To help guide the implementation of the electronic reporting requirement, the California Health and Safety Code also required CalEPA to give higher priority to information relating to chemicals of greatest concern.

In identifying the chemicals of greatest concern, CalEPA gathered existing information from the Department of Homeland Security's "Chemicals of Interest Table" and the California Accidental Release Prevention Program's list of "Regulated Substances." To assist UPAs with prioritizing the use of resources to help in getting businesses to report into the statewide information management system, CalEPA compiled the attached Chemicals of Concern Prioritization Table (Prioritization Table) to identify the hazardous materials that pose the highest risk.

It is important to ensure all regulated businesses have submitted the required information electronically. However, CalEPA realizes that this is a large task that requires substantial resources and time to accomplish. Therefore, CalEPA recommends that each UPA institute a process to apply local resources to systematically ensure that all regulated businesses have submitted the required information into statewide information management system.

The Prioritization Table is intended to be used by UPAs as a guide to systematically ensure regulated businesses handling the chemical of greatest concern submit Unified Program information electronically. It is not a mandate. CalEPA encourages the use of the Prioritization Table to ensure facilities with higher risk chemicals are assigned a higher priority for submission of information.

Please direct questions regarding this guidance letter to John Paine, CalEPA Unified Program Manager, at (916) 327-5092 or email john.paine@calepa.ca.gov.

A handwritten signature in black ink, appearing to read "Jim Bohon". The signature is fluid and cursive, with the first name "Jim" and last name "Bohon" clearly distinguishable.

Jim Bohon, Assistant Secretary
California Environmental Protection Agency
