

# CERS Schema Change Log Summary

## Release 1.13 → Release 1.14

*Prepared by John Miller    October 1, 2020*

---

This technical document summarizes changes in the CERS EDT XML Schemas since the previous 1.13 Release.

**Release 1.14** affects the Regulator Facility Submittal Query (RFSQ) schema. A new value (8) has been added to the SubmittalStatusType type. This value (8) represents the new status type of Certified, which was added to support Annual HMBP Certifications for AB 1429.

The Regulator Facility Submittal Query endpoint will updated to the new version 1.14 on 10/1/2020 in the CERS EDT Staging environment, and will be deployed to the CERS production environment after verification testing has been completed in Staging by the EDT implementer community. Once the RFSQ endpoint has been updated to 1.14, all XML results returned from this endpoint will be the 1.14 schema version (RegulatorFacilitySubmittalQuery.xsd).

All public information about CERS EDT is posted at <http://cers.calepa.ca.gov/EDT/> .
